Avtron HS25A Encoders

Light Mill Duty Optical Hollow Shaft Encoder

Tough and Compact!

 Fits shafts 3/8" to 3/4"
 Simple Installation
 Unbreakable Optical Disk
 Up to 8192 PPR
 Wide-Gap Technology: Up to 8X larger gap between sensor and rotor
 Replaces Competitive Models without Rewiring
 Fits end of shaft applications
 IP65/Nema 4, 13 Rating: Dust and Liquid Tight
 Superior Bearings and Seals
 -20°C to +100°C Operation
 2 Year No-Hassle Warranty

HS25A

HS25A encoders fit shafts from 3/8" to 3/4" easily, using a durable shaft insert; units may be resized by replacing or removing the insert, enabling our factory, distributors, and customer stockrooms to swiftly meet any need. The shaft insert (3/8" to 5/8") [6 to 16mm] also provides isolation from motor shaft currents, while permitting case grounding to meet NEC requirements.

Avtron encoders have superior shaft seals and bearings that stay sealed to keep contaminants out, through temperature cycling and liquid sprays. Our encoder seals are protected by mechanical barriers to prevent flexing or failure, and Avtron's superior bearings feature synthetic lubricants for even longer life.

Many competitive optical encoder designs risk sensor damage from any vibration or shock: sensors ride less than four thousandths of an inch from the thin, often flexible, optical disk spinning at full motor speeds. Some designs even use thin glass disks in "industrial" products! Avtron uses only unbreakable disks and a sensor to disk gap over 8X larger than the competition.

Our optical HS25A encoders use superior sensor, disk, bearing, and seal technology to give top performance in industrial conditions. Select an Avtron HS25A today!

OUTLINE DRAWING

MORE HS25A ADVANTAGES

- All digital, fully integrated design
- No mechanical adjustments or trim potentiometers L.
- Innovative shaft ring retains collar during installation 1
- Advanced sensor technology L

1

- Superior bearings with synthetic lubricant for longer life
- L T
 - No extra charge for signal complements and marker pulse (A,A-, B,B-, Z,Z-)
 - Insulated from motor shaft currents using shaft inserts
- Units can be resized by interchanging or removing shaft inserts 1
- Optional basket guard adds even more protection

HS25A SPECIFICATIONS

Operating Power: Volts: 5 - 28 VDC; Current: 50mA, no load Output Format: A Quad B with marker (A,A-, B,B-, Z,Z-) Frequency Range: 0 to 125 KHz PPR: 1 - 3600 standard (for other PPR needs up to 8192 consult factory) Speed: 6000 RPM Max., (for higher speeds, consult factory) Temperature: -20° to 100°C Environmental: IP65; Nema 4, 13 Rating Vibration: 5-2000Hz Shock: 50G, 11mS duration

Weight: 0.95 lbs [431g]
