

Environmental Targets

Targets

We here at Penlink are committed to minimizing the impact of our activities on the environment. We have defined the below environmental targets to fulfill this:

1. Take environmental footprint into consideration when proposing products and solutions to our customers in all cases (100%).
2. Select transportation of goods with as minimal environmental impact as possible (ISO 14001 certified carriers) at all times. Minimum 95%.
3. Measure and control our energy consumption and use renewable sources of energy (when possible). Minimum 65% renewable energy.
4. Recycle our internal waste of paper, batteries, toner, plastic and cardboard materials etc (100%).

Action Plan

Action plan to achieve our targets:

1. We shall during our design work, reduce the total environmental impact on the solutions we offer to our customers, and also consider the previous solutions our customers have used.
2. We use DHL mainly for all of our transports, ISO 14001 certified. We also try to reduce the number of shipments, and ship several orders into the same package.
3. Use our office electricity with renewable energy through Fortum.
4. We have an internal recycling center in the office building, where we recycle all our waste. As well as reuse packaging material according to our best ability.
