

# PENLINK | CUSTOMIZED SERVO DRIVES

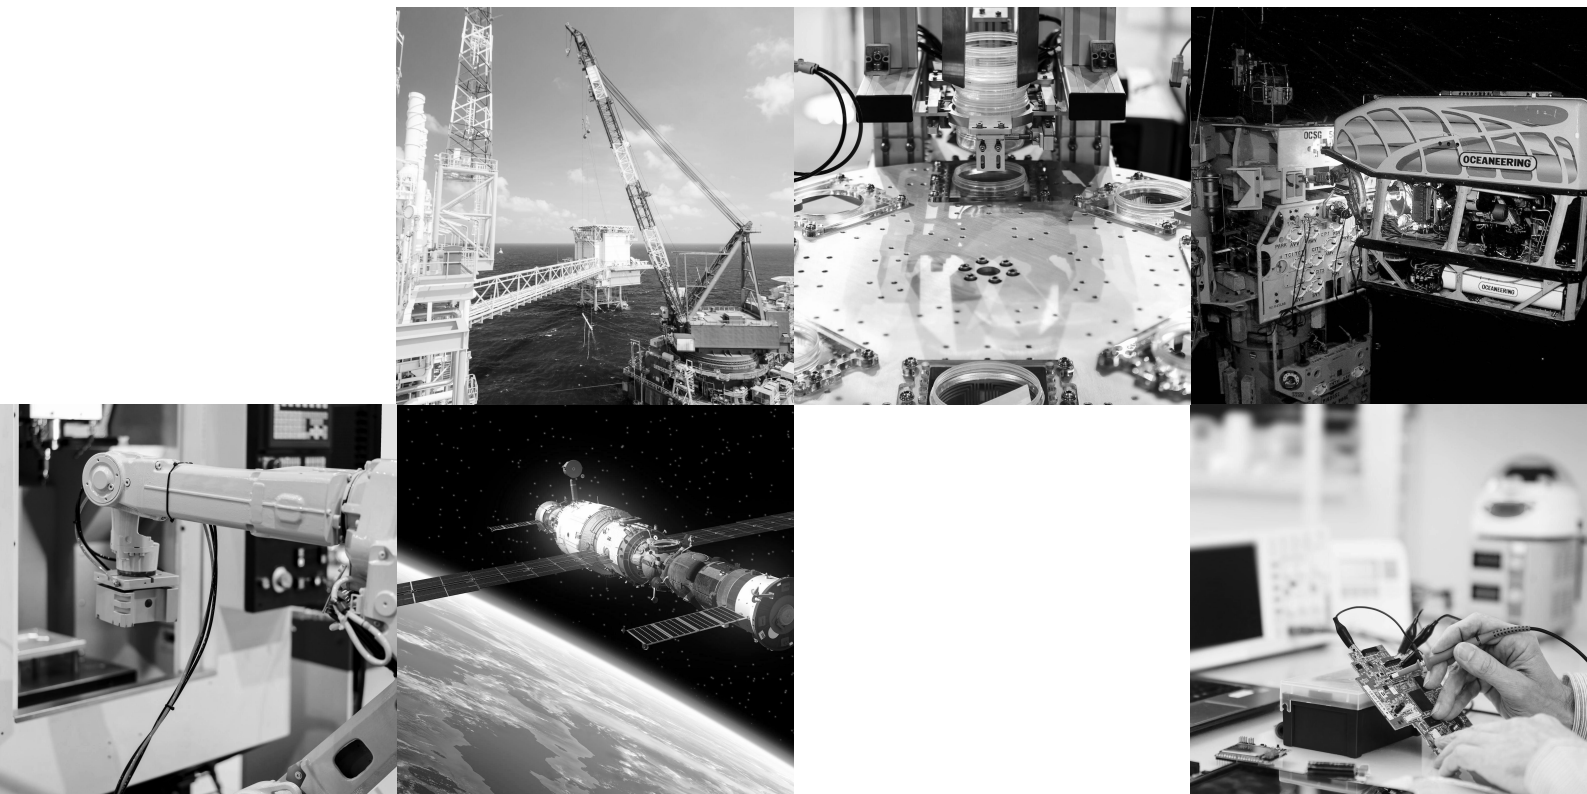

Your customized servo drive without restrictions!

- **Tailored motion solutions, customized drives that fit your applications and requirements**

Struggling with a particular need using standard products? Finding a servo drive solution that suits your exact demands is not easy. Whatever your requirements are, we can help you!

We create complete integrated drive development solutions for actuator manufacturers and OEMs, which mean you can focus on what you do best. Our Engineers will guide you through product definition to production and customer support.

## PENLINK

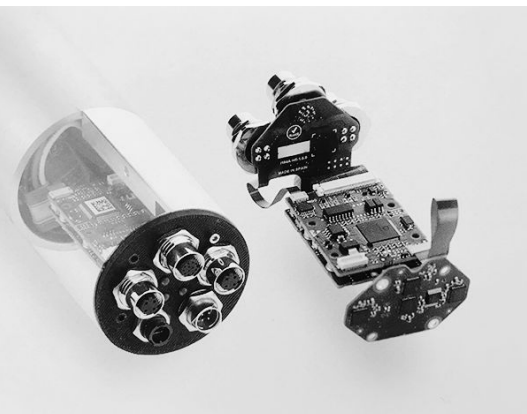

# P | CUSTOMIZED SERVO DRIVES

Your customized servo drive without restrictions!

## WORKING TOGETHER TO MAKE GREAT DESIGN

Our team at Penlink uses the most advanced tools to create, debug, maintain and support our customers in the most transparent, agile and effective way.

Transparent Documentation  
& Version Control

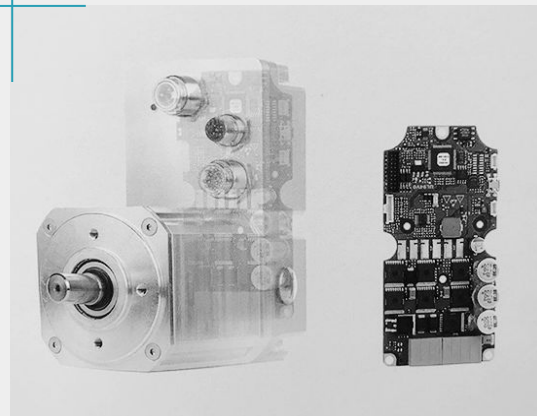

Agile Project Management  
& Issue Tracking

World Standard Electronics  
Design Software

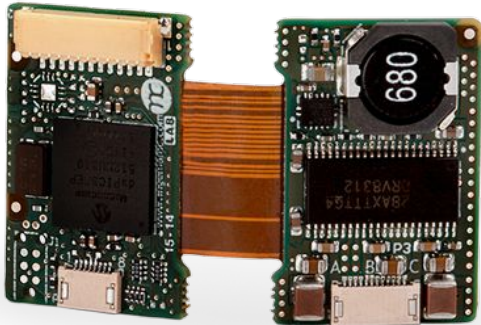

Online and Offline  
First-Class Support

# P | CUSTOMIZED SERVO DRIVES

Your customized servo drive without restrictions!

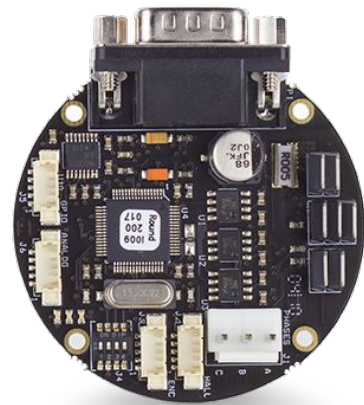

## FULLY OPTIMIZED

Have you ever thought about what a perfect integration between your projects actuator and drive might look like? Our professionals can make it a reality for you by identifying the best options for our application.

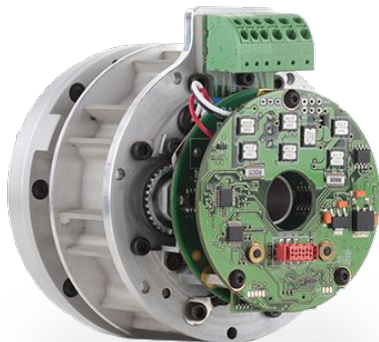

## MADE TO FIT FORM AND FUNCTION

Our building block based approach makes providing our customers a quick and effective general architecture for the system overview easily attainable. We have a broad experience in fulfilling certifications and standards (UL, MIL, CE..) so we can guarantee that the component selection will be appropriate for each market you need access too.

# P | CUSTOMIZED SERVO DRIVES

Your customized servo drive without restrictions!

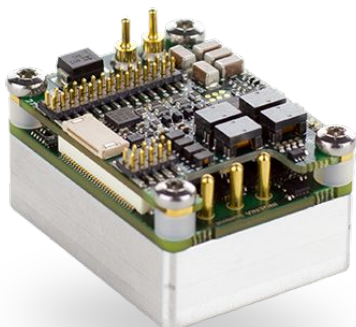

## ALL-IN-ONE ROTARY MODULES

Struggling with a particular need using standard products? Finding a servo drive solution that suits your exact demands is not easy. Whatever your requirements are, making your own custom servo drive controller has never been so easy when working with Penlink.

## TINY YET POWERFUL

Electromechanical actuators are most economical when deployed in a moderate scale in processes where their performance advantages can be a benefit and when the electronics are separate from the actuator to segment and minimize replacement costs.

## TAILORED SERVO DRIVE

The i199A is an ultra-compact, super smart, high-powered custom servo drive. Thanks to its small size and rugged design it can be mounted virtually anywhere: collaborative robot joints, wearable robots, unmanned ground or aerial vehicles as well as inside motors.
