

- **Working in big warehouses will be easier with our products and solutions for palletizing!**

We provide a wide range of electrical slip rings to various palletizing applications. The slip ring can transfer data, signal, power and we can modify standard solutions to fit your application!

In modern palletizing systems the motion control has become more advanced, static positioning to dynamic motion control acting as an industrial robot, we have the motion control solution for you!

## PENLINK

## WORKING TOGETHER TO MAKE GREAT DESIGN

Our team at Penlink uses the most advanced tools to create, debug, maintain and support our customers in the most transparent, agile and effective way.

Transparent Documentation  
& Version Control

Agile Project Management  
& Issue Tracking

World Standard Electronics  
Design Software

Online and Offline  
First-Class Support

Standard or Customized options

## STANDARD OR CUSTOMIZED ROTARY UNION

With the help of our partner we can deliver standard and customized Rotary Unions to our customers.

This Rotary Union is one of our standard models.

- + Low Torque Seals
- + Compact Design
- + NPT / BSPT Connection Options
- + Lightweight Construction
- + Corrosion Resistant
- + Low Heat Generation
- + Increased Seal Life Performance
- + Cost-effective
- + Customized Options

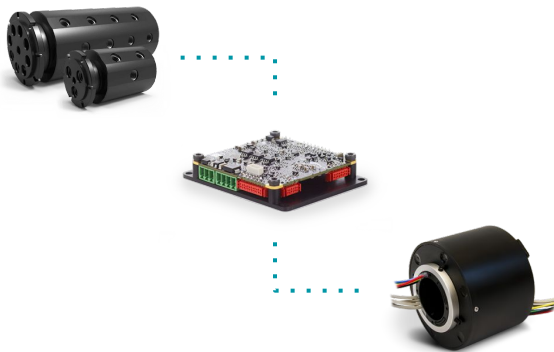

## ELECTRICAL SLIP RINGS

This product is modified to fit our customer's needs. Are you interested in what's possible when choosing a modified design? Get in touch with us to learn more about your possibilities in creating and modifying our standard products when working with Penlink.

## STANDARD DRIVES

The Nix Digital Servo Drive is an ultra-compact solution providing top performance, advanced networking and built in safety, as well as a fully featured motion controller. The NIX can control multiple motor types and supports almost any feedback sensor including absolute serial encoders.

## INTEGRATIONS = SOLUTIONS

If your project requires integration with other products such as slip rings, drives and motors we can help you with that. Penlink has a lot of knowledge when it comes to our products and together with our suppliers we can offer full support when it comes to integrations. Get in touch with us to learn more about how this process is done!
